Dan,

I was wondering if any of the PRP have a larger share of the costs or if it is share evenly among the four.

Thanks,  
Emalee

Ms. Doyle,  
The PRPs for OU-1 are Cotter Corporation (N.S.L.), Laidlaw Waste Systems (Bridgeton), Inc., Rock Road Industries, Inc., and the United States Department of Energy. I am not certain what you mean by an "even split" in your question below. If you are asking how the costs are apportioned among the PRPs, this is an internal matter amongst the PRPs who are working together cooperatively.

Sincerely,  
Daniel R. Gravatt, PG

Daniel,

I have another question concerning the PRPs for OU-1 (rad contamination)

Is there an even split for the Cotter Corporation, Laidlaw Waste Systems and Rock Road Industries for the site?

Thanks,

Emalee

Ms. Doyle,

The most current publicly-available document is the December 28, 2011 final SFS report. EPA is still going through an internal decision-making process based on the analysis in the SFS report. At present, there has been no decision made on which remedy to select, and thus there is no timetable for when a remedy will be implemented.

Sincerely,

Dan,

I am wondering if I have the most up to date information for the site. Latest report I have is SFS for OU-1 dated 12/28/11.  
I wanted to know what if any decision has been for the remedial solution for the site.  
Also any idea when remediation will begin or if a "Complete Rad Removal" option will be used.

Thanks,

Emalee Doyle
